

## 1. Set up GitHub Pages

<https://pages.github.com/>

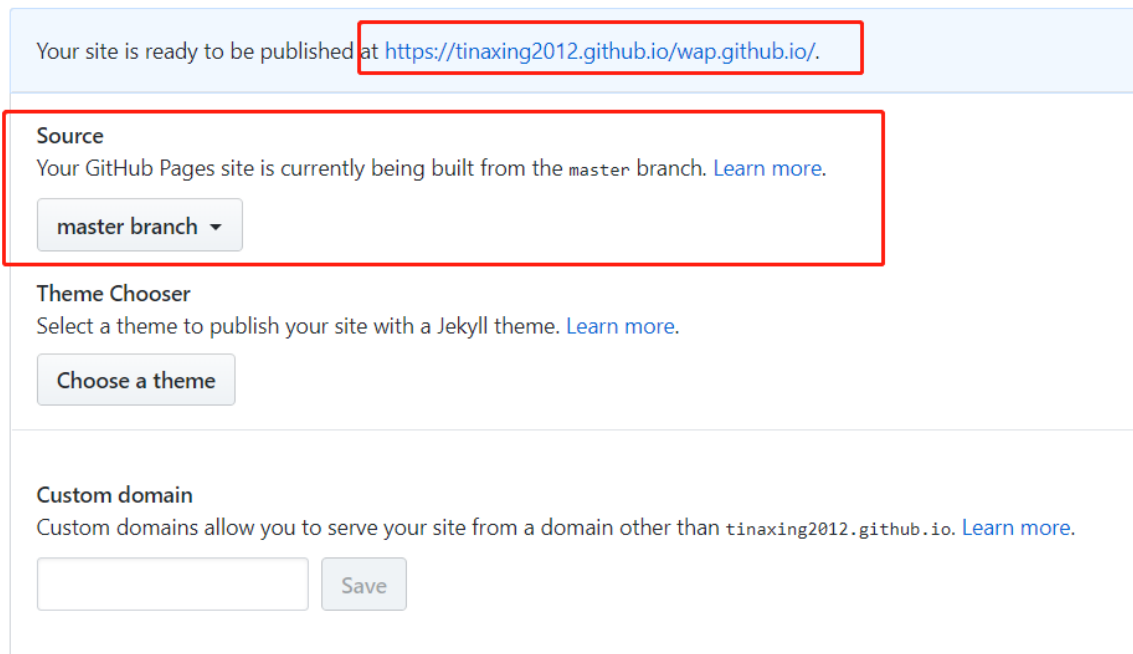

If still didn't see your site, go to Settings

Enable Github Pages

## GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

## 2. HTML Validator

<p>

<a href="https://validator.w3.org/check/referer">

</a>

</p>

### 3. CSS Validator

<p>

<a href="https://jigsaw.w3.org/css-validator/check/referer">

</a>

</p>

The difference between this doc and the slides is

You have to use HTTPS, because github pages are secured.
